EDUCATION

Carnegie Mellon University

Bachelor of Mathematical Sciences, Minor in Computer Science

GPA: 3.88/4.0

Selected Coursework: Introduction to Mathematical Finance, Multidimensional Calculus, Principles of Imperative Computation, Mathematical Concepts and Proofs, Matrices and Linear Transformations, Fundamentals of Programming and Computer Science

Activities: Carnegie Mellon Informatics and Mathematics Competition (CMIMC), Quant Club

Pittsburgh, PA

August 2025 — May 2029

American Heritage Schools – Broward Campus

Diploma

GPA: 5.75/6.0

Completed Coursework: Machine Learning & AI, Differential Equations, Multivariable Calculus, Linear Algebra, AP Calculus AB-BC Competition, AP Statistics

Plantation, FL

August 2021 — May 2025

SKILLS

Programming Languages and Tools: Python, C, LaTeX, Linux, Github, Microsoft Azure, NumPy, Pandas, Scikit-learn, TensorFlow

Languages: English, Portuguese

EXPERIENCE

CMU SURA Researcher

Carnegie Mellon University

Remote

May 2026 — July 2026

- Performing remote research on the Theory of Computation using Raymond Smullyan's book *To Mock a Mocking-bird* under the guidance of Professor Richard Statman.

AI Software Engineer Intern

Starwood Property Trust

Miami Beach, FL

May 2025 — June 2025

- Using Python and the OpenAI library, trained and evaluated a custom GPT-based classifier on a large collection of PDF-extracted text to identify legal documents, achieving 100% accuracy on an internal test set.
-

PROJECT EXPERIENCE

Brief.ly – Application, Hackathon Submission

NOVA Hackathon, Scotty Labs

Pittsburgh, PA

November 2025

- Developed a GPT-based summarization module to convert scraped news articles into structured summaries for personalized newsletters in Python.
- Integrated a multi-step pipeline spanning web scraping, summarization, and automated email delivery.

Tetris AI – AI Model

American Heritage Schools - Broward Campus

Plantation, FL

December 2024

- Designed and trained a Tetris agent in Python using a genetic algorithm, clearing 100,000+ lines in a single run.

Coral – Application

American Heritage Schools - Broward Campus

Plantation, FL

August 2023 – December 2023

- Co-founded "Coral", a volunteering application built to connect students to local volunteering opportunities.
 - Engineered the back-end API and database infrastructure using Flask, implementing user data management and application functionality.
-

HONORS & AWARDS

CMIMC Integration Bee 1st Place

March 2025

44 "Top 5" Awards in Mu Alpha Theta Competitions

January 2022 — July 2025

Three-time AIME Qualifier (Best Score: 7)

October 2022 — February 2025
